Title: Service Test Disk (STD) for Pioneer AVIC-Zx/HDx

Year / Release: 2007

Supported languages: English

Compatible with: Pioneer AVIC-Zx/HDx

Description: Service Test Disk (STD)

A disc that allows you to test your navigation system.

Best of all, there is a function for removing the internal hard disk lock

Ext. Information: Advanced - Brochure Service Manual

The procedure to unlock your hard disk

1. Burn "Service Test Disc" on CD-R disc
2. Ignition Key to the ACC
3. Insert the Service Test Disc into AVIC
4. When the disc is inserted
 - it will say "The media is being checked"
 - followed by a title shows "06 INTERNATIONAL NAVI TEST DISC: GGV1194"
 - Then the "Test Menu appears"
5. At the "Test Menu", select next page with 'TRK ->' button.
6. Scroll down to option 9 "HDD FLG Set" with the 'PLIST DOWN' button - p. 214 manual and press 'MENU' button to enter setting mode
7. At the "press POS to change flag" prompt, press the "MAP" button
8. Now the AVIC unlocks the hard disk
9. Return to the main menu by pressing the 'AV' button
10. On the menu screen "9 HDD FLG Set" will be marked with an asterisk - * which means that the password is temporarily removed
11. Open the display to horizontal
12. Turn the ignition key to 0
13. Unscrew the two HDD cover T8 screws
14. Now you can connect the HDD to your PC and perform all the necessary updates
15. *OPTIONAL* use MHDD program on PC to disable the ATA security.
16. Replace the hard drive into AVIC and tighten the screws
17. Turn the ignition key to AC
18. The unit starts and the screen is shut. At this point you can click the Eject button and remove the disc into the drive
19. Press the switch 'RESET' (This action is always advisable to do after work in test mode, then prepare the system for everyday use)
20. master password will again be restored to disk. (unless you disabled with MHDD).
